PREFACE

The introduction of 'Pocket Book of Agricultural Statistics' in 2013 as an abridged version of 'Agricultural Statistics at a Glance' was conceived as an innovative idea to provide all the important statistics relating to agricultural sector in a concise format. The publication has received appreciation from various quarters and it has now become a regular publication of the Directorate of Economics & Statistics.

I am delighted to share with you the 2020 edition of 'Pocket Book of Agricultural Statistics'. Taking forward our endeavor to incorporate information on emerging areas which are frequently used in policy making, this edition has been enriched with the updated information on various new initiatives of the Government, viz., Pradhan Mantri Fasal Bima Yojana (PMFBY), Soil Health Card Scheme, Micro Irrigation, etc. It also includes latest international statistics on agriculture sector to provide a global perspective, in addition to demand-supply projections of agricultural commodities, trend in inflation of agricultural commodities, results of the Livestock Census 2019, etc. A copy of this publication has also been uploaded on our website <http://des-dacfw.nic.in> for information of public at large.

Congratulations to the Publication team led by Shri Anil Kumar Sharma, Adviser responsible for bringing out this publication.

Suggestions for improvement are most welcome which may be sent to jac-des@gov.in.

Notes :

1. For 2001, figures include estimated figures for those of the three sub-divisions viz. Mao Maram, Paomata and Purul of Senapati district of Manipur as census results of 2001 Census in these three sub-divisions were cancelled due to technical and administrative reasons.
2. The 1991 Census could not be held owing to disturbed conditions prevailing in Jammu & Kashmir. Hence the population figures for 1991 of Jammu & Kashmir have been worked out by 'interpolation'. The data on workers in Col. 5-7 exclude J&K.
3. The 1981 census could not be held in Assam. The figures for 1981 for Assam have been worked out by interpolation. The data on workers in Col. 5-7 exclude Assam.
4. Figures within parentheses in Col.-4 are percentages to the Total Population.
5. Figures within parentheses in Col.-6 and 7 are percentages to Col.-8.
6. Figures within parentheses in Col.-8 is percentage share of Agricultural Workers in Total Workers.

**Cropping Intensity is percentage of Gross Cropped Area to Net Area Sown.

Notes: 1: Percentages worked out over Reported Area.

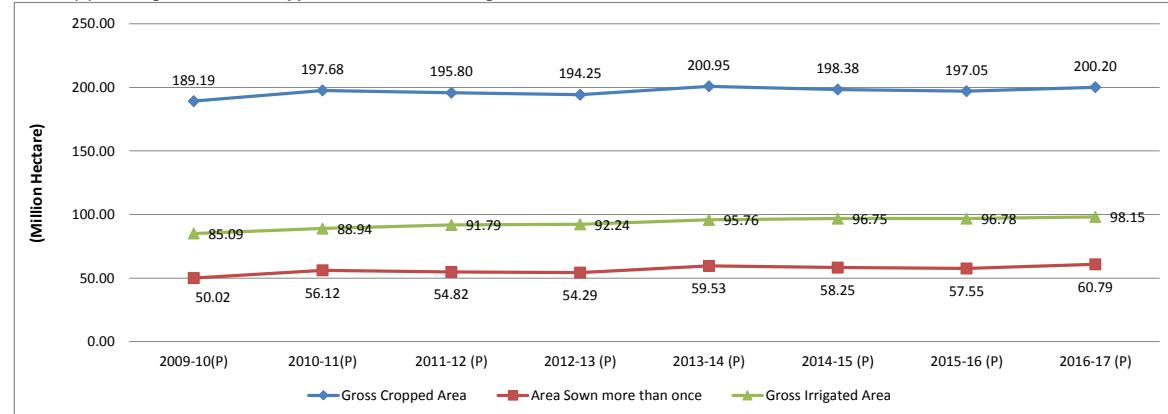

2. In 2009-10 there was significant decline in Total Cropped Area and Net Area Sown due to decline in net area sown in the states of Andhra Pradesh, Bihar, Jharkhand, Rajasthan, Tamil Nadu, Uttar Pradesh and West Bengal. This was mainly due to deficient rainfall.

APPENDICES

A.1: Explanatory Notes

Advance Estimates

The estimates of area, production and yield rates for 2019-20 used in the publication are “Fourth Advance Estimates” as on 19.08.2020 and are based on data received from State Governments, validated through deliberations held in weekly inter-disciplinary meetings of Crop Weather Watch Group (CWWG), availability of water in major reservoirs in the country, area enumeration based on Remote Sensing Technology, estimates from Econometric Modeling, availability/supply of important inputs, including credit to farmers community, feedback received from states, etc. These estimates are “advance” in the sense that these have been prepared in advance of availability of results of CCE (Crop Cutting Experiments) and are subject to revision as more precise information flows over time from States to the Directorate of Economics & Statistics.

Yield

Yield rate is defined as production per unit of area. However, yield rates of various crops given in this publication may not exactly tally with the ratio of production to the corresponding area because figures of area and production of various crops have been generally rounded off in ten thousands.

Principal Crops

Principal Crops as referred to in this publication include only those crops which are covered for preparation of index numbers.

Nine Oilseeds

Wherever “Nine oilseeds” is mentioned in this publication, it includes castor seed, groundnut, linseed, nigerseed, safflower, sesamum, soybean, sunflower and rapeseed & mustard.

Total Oilseeds

Total oilseeds include cottonseed and coconut besides nine oilseeds mentioned in the above paragraph.

Net Availability of Foodgrains

The Net availability of foodgrains is defined as, where

$$\text{NAF} = \text{GP} - \text{SFW} - e + i + s$$

NAF = Net availability of Foodgrains

GP = Gross Production of Foodgrains

SFW = Seed, feed and wastages of Foodgrains

e = Exports of Foodgrains

i = Imports of Foodgrains

s = Change in Stocks of Foodgrains

To work out per capita net availability of foodgrains in terms of kg. per year, NAF is divided by the estimated population for a particular year. When this is further divided by the number of days in a year i.e. 365 days, it gives net availability of foodgrains per day.
