Department of Economics and Statistics

Chennai - 600 006

PREFACE

Agriculture continues to be the most predominant sector of the state economy, as 70% of the population is engaged in agriculture and allied activities for their livelihood. The state has an area of 130 lakh hectares with a gross cropped area of 59 lakh hectares. The Government's policy and objectives have been to ensure stability in agricultural production and to increase the agricultural production in a sustainable manner to meet the food requirement of growing population and also to meet the raw material needs of agro-based industries thereby providing employment opportunities to the rural population.

The Department of Economics and Statistics is releasing this report entitled "Season and crop report of Tamilnadu" annually. The information and the data provided in the report are pertaining to 2013-14. The data required for this publication have been collected and compiled from various Departments / agencies.

The estimates of agricultural production have been arrived based on the yield rate derivatives obtained as a result of Crop Estimation Surveys conducted by this Department by utilising the services of the officials of the Departments of Agriculture and Horticulture. For minor crops such as Onion, Chillies, Turmeric, Tapioca, Coconut, Fruits and Vegetables, the results of the Crop Estimation Surveys conducted by field staff of this Department have been adopted.

A comprehensive picture on the price situation has also been incorporated in this report throwing information on Wholesale prices, Retail Prices and Agricultural wages the data of which were collected by this Department from various agencies.

This Report consists of three major parts.

Part-I deals with monsoon behavior, Land Use pattern, irrigation and comparative analysis of area, production and yield rate of principal crops with that of previous year.

Part-II contains Summary Tables and Index Numbers of Agricultural Economy and Part-III provides district-wise data on Rainfall, Land Use Statistics, Sources of Irrigation, Area, Production and yield rate of crops, agricultural wages, wholesale and retail prices etc.

We hope that the data furnished in this report would certainly be beneficial to all stakeholders for effective planning and implementation of variety of agricultural programmes for sustainable development of agricultural sector in the state.

Suggestions for improvement of this publication are most welcome.

An Overview

TAMILNADU MAP

EXECUTIVE SUMMARY

Tamil Nadu, located in the South-Eastern part of Peninsular India, with a geographical area of 130 lakh ha. is the eleventh largest state in India. It is the second largest economy and the most urbanised state in the country.

Tamil Nadu occupies 4% of India's geographical area and possesses only 3% of water resources. The State has a coastal line of 1076 kms. Climate in the State is mainly tropical and the temperature ranges between 18°C and 43°C. The state has been divided into Seven agro-climatic subzones for planning agricultural development. Semiarid conditions dominate the climate in three sub-regions: north, north-east coastal and south-east coastal. The delta and central regions mainly

have semiarid to dry-sub-humid climates.

The Gross State Domestic Product (GSDP):

At Constant prices (2004-05)

The Gross State Domestic Product (GSDP) of 2013-14 at constant prices stood at Rs. 480618.05 crores with a growth rate of 7.29%. where as the GSDP on Agriculture and allied sector at constant prices showed a positive growth rate of 8.22%.

At Current Prices (2013-14):

The GSDP at current prices stood at Rs. 854238.16 crores showing a positive growth of 14.68% during 2013-14 while the GSDP on Agriculture and allied sector at current prices stood at Rs. 87203.10 crores with an impressive growth rate of 16.78%.

1. RAINFALL AND SEASONAL CONDITIONS

Bi-monsoonal patterns dominate rainfall in the sub-agro-climatic zone of TamilNadu. Being situated on the eastern side of the Western Ghats, most parts of Tamil Nadu miss a substantial part of dependable rainfall in the south-west monsoon.

During the year under report the actual rainfall recorded at 790.6 mm was lesser by 14.1% against the normal rainfall of 920.9 m.m. This may be attributed to the lesser rainfall received during the North-East Monsoon, the prime mover of agricultural activities in Tamilnadu by 33.2% even-though the position during other seasons was found satisfactory.

However, the south-west monsoon contributes to 41% of the annual rainfall of about 791 mm during 2013-14.

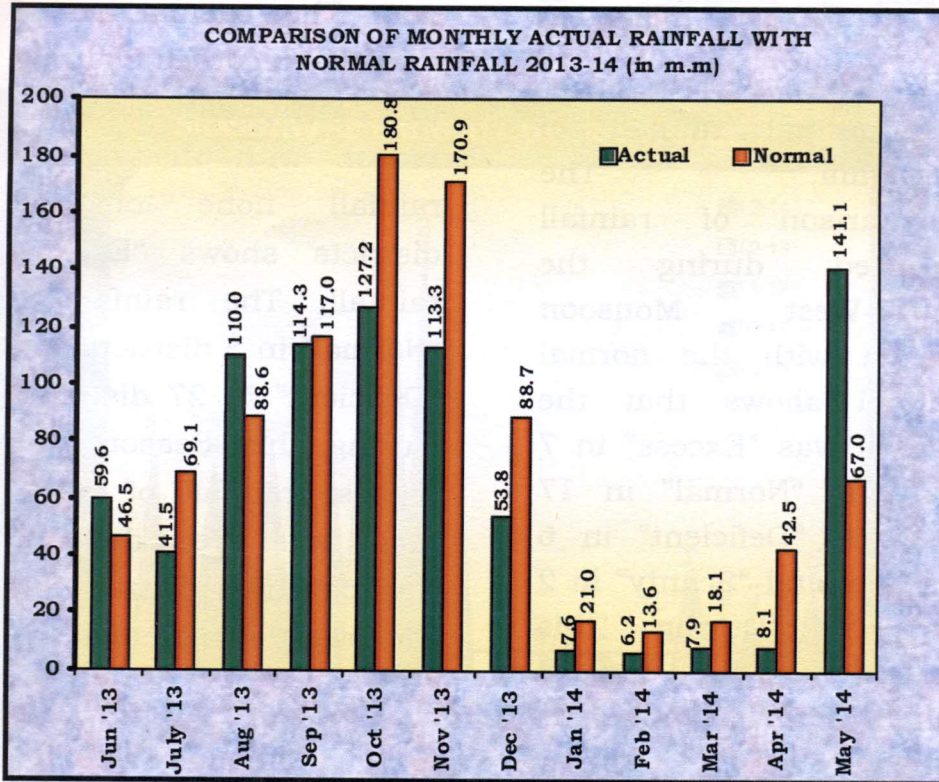

Almost all of the districts of Tamilnadu received lesser actual rainfall compared to the normal rainfall of each of the districts except Coimbatore, Theni, Thirunelveli, The Nilgiris and Kanyakumari. The rainfall was the highest in the Nilgiris District (1765.7m.m) and the lowest was (335.3 mm) in Thiruppur district.

The Season-wise contribution of rainfall to the total rainfall during the year 2013-14 is given below.

(in mm)

Season	Actual	Normal	Seasonal Contribution (%)	% Variation to Normal
1.South-west Monsoon	325.4	321.2	41.2	1.3
2.North-East Monsoon	294.3	440.4	37.2	-33.2
3.Winter	13.8	31.3	1.7	-55.9
4.Hot-Weather	157.1	128.0	19.9	22.7
Total	790.6	920.9	100.0	-14.1

3. LAND HOLDINGS

According to the 2010-11 Agricultural census, the State had 81.18 lakh holdings with an operating area of 64.88 lakh ha. Marginal farmers (area less than 1 ha.) constitute 77 per cent who operated 35% of the total area. Small farmers (1 to 2 ha) had a share of 15% and operated 25.3% of the total area. Semi-medium (2 to 4 ha.) and

medium farmers (4 to 10 ha.) accounted for 7.5% and operated 34.0% of the total area. Large farmers (more than 10 ha.) had a share of 0.4% operated 5.4% of total area. Average size of holding in the state was 0.80 ha. In Tamil Nadu the per capita availability of land is only 0.19 ha and the per capita net sown area is only 0.10 ha.

4. LAND USE PATTERN

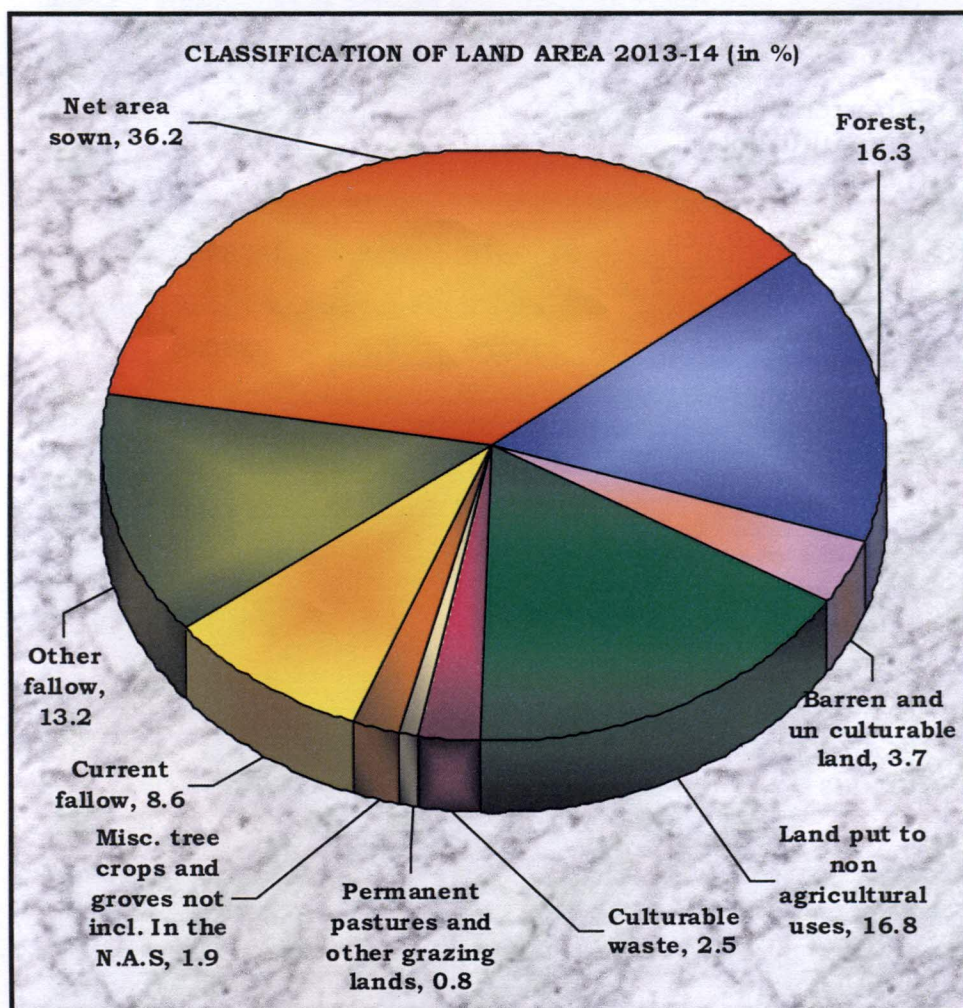

The total Geographical area of the State is 1,30.33,116 hectares. The Geographical area of Tamilnadu has been classified according to different types of land use is presented in the table below.

While cultivated land (*cultivated atleast once in its entire span*) consisting of net area sown, current fallow and other fallow lands is 7546734 ha. (which is 58% of the total

geographical area), land not cultivated but available for cultivation (culturable waste) is 328326 ha forming 2.5% of the total geographical area during 2013-14.

5. DISTRIBUTION OF LAND IN VARIOUS DISTRICTS

Forest

Forest represent all actually forested area on the lands classed or administered as forest under any legal enactment dealing with forest, whether state owned or private. Erode district with an extent of 227511 ha under forest is the highest among districts in their contribution to the forest area of the state. This works out to 10.7% of the state's total forest area. The unique feature of The Nilgiris district is that about 56% of the total area of the district is under forests.

Barren and unculturable Land

Land which cannot be brought under cultivation unless at a high cost whether such land is in isolated blocks or within cultivated holdings, such as

mountains, deserts, hills etc. are classified as barren and unculturable land. Villupuram district alone accounted for 56,651 ha which is 11.6% of the state's barren and unculturable land and about 7.8% of its geographical area under this category. The area under this category is very meagre in Thiruvavur district with just 113 ha.

Land put to Non Agricultural Uses

The land put to use for purposes other than agriculture such as buildings, pathways, roads, social forests, bus stands, railway tracks, canals, rivers, local reservoirs, swamps, marshy and water logged areas, lands under still water etc. are brought under this category.

In Chennai district about 98.2% (16798 ha.) of its geographical area is put to non-agricultural uses because it is metropolis followed by Kancheepuram district with an extent of 151644 ha (34.2%).

Culturable Waste

All lands available for cultivation whether not taken up for cultivation or taken up for cultivation once, but not cultivated during the current year and continuously for the last five years or more in succession for one reason or the other are classified as culturable waste. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. Karur district alone shares 20% (65536 ha.) of the total area of the state under this category.

Permanent Pastures and other Grazing Lands

All grazing lands whether they are permanent pastures or meadows are considered as permanent pastures and other grazing lands. Village common and grazing lands within forested area are included under this category. The extent under this category was the highest in Kancheepuram district with 18286 ha (16.7%)

Misc.Tree Crops and groves not included In the Net Area Sown

All cultivable lands, which is not included under net area sown, but is put to some agricultural use such as lands under casuarina, eucalyptus, teak, bamboo bushes, babul, thatching grass and other groves for fuel etc.

which are not included under orchards and which bear yield only once in its whole life span are classified under this category. Thoothukudi district with 37571 ha. ranked first contributing 15.4% of the total area of the state under this category followed by Ramanathapuram district with 32216 ha. (13.2%).

Current Fallow Lands

Lands that are kept fallow out of the net area sown during the previous year are classified as current fallow for the reporting year. The extent under this category is the highest in Tiruvannamalai district with 141239 ha. (12.7%) under this category.

Other Fallow Land

Land which were taken up for cultivation but have been temporarily

put off cultivation for a period of not less than one year but not more than five years due to poverty of the cultivators, inadequate supply of water, silting of canals and rivers, etc. are treated as other fallow land. The land under this category was the highest in Thirunelveli district with 190776 ha. (11.1%) followed by Virudhunagar district with 178046 ha. (10.4%)

Net Area Sown

The Net area sown represents the area sown under first crop during the fasli year. Out of the total geographical area, 4713862 ha. of land constituting 36.2% was cultivated once with various crops during the year 2013-14. When compared to the previous year, the area under this category has increased by 169622 ha (3.7%).

When comparing the net area sown with that of the geographical area of the district, Thiruvarur and Tirunelveli districts are ranked first and least, contributing 72.4% and 19.8% of its geographical area respectively towards this category.

Gross Area Sown

The Gross area sown represents the total area cultivated under all food and non-food crops including the area sown more than once during the fasli year. The gross area sown during 2013-14 is 5897472 ha. as against 5139832 ha. during 2012-13, registering an increase of 757640 ha. (14.7%).

Area sown more than once

The area own more than once represents the difference between the

gross area sown under all crops and the net area sown during the fasli year.

The area sown more than once during 2013-14 was 1183610 ha. as against 595592 ha. in 2012-13, the increase being 98.7%.

The area sown more than once is 20.1% of the gross area sown in the state during 2013-14.

Cropping Intensity

Cropping intensity refers to the ratio between the Gross area sown and the Net area sown.

The cropping intensity for the State during 2013-14 is 1.251. It is the highest in Thiruvarur district with 1.979 followed by Nagapatinam district with 1.779.

6. SOURCES OF IRRIGATION

Irrigation is a vital input for food security in the State of Tamil Nadu. It is the artificial application of water to the soil for growth of plants.

Sources of Irrigation

Water is an important determinant factor of production of crops in agriculture sector. Intensive and extensive cultivation of land depend mainly on the availability of water. Medium and minor irrigation schemes are implemented in the state for augmenting the irrigation for agriculture.

Among the sources of irrigation wells accounted for 62%, followed by canals (24%) and tanks (14%) of total net area irrigated of 27

lakhs ha. in 2013-14. The Net area irrigated constituted 57% of the net sown area. It shows that the agricultural and allied activities are monsoon – dependent and agriculture dances to the tune played by the monsoon. The number of reservoirs varies from 1 in Cuddalore district to 13 in Thirunelveli district.

A perusal of date of opening of the Mettur reservoir, the lifeline of the State's agriculture, shows that it was opened about two months later on Aug.10th against the scheduled opening date of 12th June of every year. It had impacted the raising of kuruvai cultivation in the Cauvery delta regions.

The delay created ripple effects in these regions. Considering the area irrigated under different

crops for the year 2013-14, the following table shows the figures on major heads.

Crop	Gross area sown (in ha).	Gross area irrigated (in ha).	% of gross area irrigated to gross area sown
Foodgrains	3474573	1958538	56.4%

Area Irrigated

The net area irrigated by different

sources during 2013-14 was 2679096 ha. as against 2642700 ha. in 2012-13, showing an increase of 1.4% over the previous year. The net area irrigated during 2013-14 constituted 56.8% of the net area sown in the state. Villupuram district is at the top with 238870 ha. However the highest percentage of the net area irrigated to the net area sown was recorded in Thiruvarur District with 96.54% whereas the lowest percentage was recorded in The Nilgiris district with 0.44%. The following table shows the net area irrigated by various sources compared with 2012-13.

(in ha)

TOTAL		2679096	100.0	2642700	100.0	1.4

Canals (Including System Tanks)

Canals are the major source of irrigation in Tamilnadu. As the system tanks get supply from a permanent storage like reservoirs, dams etc., the area irrigated by this source is classified under canals. During 2013-14, Canal irrigation accounted for 24.4% of the net area

irrigated by all sources in the state. Nagapattinam Thanjavur and Thiruvarur districts together share about 62% of the total net area irrigated by canals in the State.

Tanks

(Non-System Tanks Only)

The non-system tanks which are fed partly from their independent catchment areas and partly from the diversion of river water and jungle streams depend fully on rain. The Non-system tanks contribute about 14% of the net area irrigated by all sources in Tamilnadu during the year 2013-14. Tanks are the main source of irrigation in Ramanathapuram district where 80% of its

total area irrigated was only from tanks which is followed by Pudhukottai with 60%, Sivagangai with 58% and Kanyakumari with 52%.

Wells

Wells are the principal source of irrigation in Tamilnadu. During the year under review, open wells and tube-wells / bore-wells continued to be the principal source of irrigation. The net area irrigated by open wells and tube-wells / bore-wells together accounted for 1642340 ha. (about 61.3% of the total net area irrigated) in 2013-14 as against 1625934 ha. in 2012-13 showing a decrease of 1.0%.

The net area irrigated by wells during the year 2013-14 was the highest in Villupuram district with 193807 ha. Except delta districts, The Nilgiris, Ramanathapuram and Kanyakumari, almost all of the other districts of Tamilnadu have wells as the main source of irrigation, where above 50% of the total net area irrigated are irrigated only by wells.

Gross Area Irrigated

Gross area irrigated includes the net area irrigated and the area irrigated more than once.

Gross area irrigated by all sources during 2013-14 is 3310877 ha. as against 2991459 ha. during 2012-13 registering an increase of 10.7%.

Irrigation Intensity

The irrigation intensity (The ratio of gross area irrigated to net area irrigated) is 1.24 for the state during 2013-14. The ratio is significantly high in the districts of Dharmapuri (1.67), Villupuram (1.50), and Krishna giri (1.45).

7. AREA IRRIGATED UNDER DIFFERENT CROPS

Out of the total irrigated area, 49% is under Paddy, 9.5% under Sugarcane, 5.1% under Maize and 4.2% under Groundnut. The contribution of other principal crops to the Gross area sown and irrigated are shown in the following table.

(in ha)
