The maximum temperature for the next five days may decrease $1^\circ C$ as compared to the previous week

Light to moderate rainfall is predicted for next five days.

Sky condition will be generally cloudy sky.

Wind speed is expected to be 6-8 km per hour and the wind direction will be from East direction.

Crop	Stage	Agromet Advisory			
Irrigated crops	Water	Light to moderate rainfall is predicted for next five days. Hence, farmers are			
	management	request to postpone the irrigation.			
Plant protection	Rainfall	Farmers are advised to avoid spraying.			
Rainfed crops	Selection of	For sowing during the ensuing northeast monsoon season. Sorghum (K 8 & K			
	varieties	12), Black gram (Vamban 6, 8 &11), Green gram (CO 7 & CO 8).			
	Sowing	Farmers are request to take sowing with proper drainage facilities across the			
		field to collect rain water.			
Chilli	Nursery	Avoid spraying and provide drainage facilities to avoid Damping off infection.			
	preparation				
Paddy	Green	Raise green manure crops like daincha @ 20 kg/ ha in rice field for ensuing			
	manuring	season.			
	Sowing	In nursery, maintain the water level to avoid seed loss through rainfall splash.			
Banana	Vegetative to	Rainfall may lead lodging. Earthing-up and mulching operation may be			
	bunch	practiced			
	formation				

SMS: Rain: 21-25.10-6,6,25,20&30 mm. Postpone the irrigation & avoid spraying. Rice- Nursery- maintain the water level to avoid seed loss.

Tamil Nadu

With the setting in of Easterlies/Northeasterlies over southern peninsular India, Northeast monsoon rainfall activity is likely to commence over southern peninsular region in the next 48 hours. However, the initial phase of the northeast monsoon in general is likely to be weak.

Under the influence of yesterday's cyclonic circulation over southeast Bay of Bengal, a **Low pressure** area formed over southwest and adjoining southeast Bay of Bengal at 0530 IST of today 20.10.2023, and lay over the same region at 0830 IST of today, with associated cyclonic circulation extending upto mid tropospheric levels. It is likely to concentrate into a **Depression** over Westcentral Bay of Bengal around 23rd October.

Yesterday's **Low pressure** area over Southeast & adjoining southwest Arabian Sea became **Well marked low pressure** area over southwest Arabian sea at 2330 IST of 19.10.2023 and persisted over the same region at 0530 IST of today 20.10.2023. It concentrated into a **Depression** and lay centered at 0830 IST of today over the same region near latitude 9.3°N & longitude 61.7°E about 920 km east-southeast of Socotra (Yemen), 1190 km southeast of Salalah Airport (Oman) and 1280 km east-southeast of Al Ghaidah (Yemen).

It is likely to move west-northwestwards and intensify into a **Cyclonic Storm** over Southwest Arabian Sea during next 24 hours. Continuing to move west-northwestwards, it is likely to intensify into a **Severe Cyclonic Storm** in the evening of 22nd October. Thereafter, it would move north-northwestwards from 24th morning towards south Oman and adjoining Yemen coasts.

Yesterday's cyclonic circulation over Comorin area and neighbourhood extending upto 5.8 km above mean sea level persists.

Weather	Next	five	Light to moderate rain is likely to occur at one or two places over Tamilnadu,
forecast	days		Puducherry & Karaikal area on Day 1 (21.10.2023).
			Light to moderate rain is likely to occur at a few places over coastal Tamilnadu,
			Puducherry & Karaikal area on Day 2 (22.10.2023).
			Light to moderate rain is likely to occur at one or two places over interior
			Tamilnadu on Day 2 (22.10.2023).
			Light to moderate rain at a few places with thunderstorm & lightning at one or
			two places is likely to occur Tamilnadu, Puducherry & Karaikal area from Day 3
			(23.10.2023) to Day 5 (25.10.2023).
