Agro Advisory

Crop	Stage	Advisory
General		Moderate to heavy rainfall during next three days is expected with high
		wind speed of >10 km/hr in western zone districts.
		Areas along the Western Ghats may receive heavy rainfall.
		Provide adequate drainage and harvest the excess water to farm ponds
		With the receipt of anticipated rainfall dry lands may be prepared and
		sown with North East Monsoon crops such millets and pulses.
		Prevailing cloud cover with high relative humidity leads to less water
		and nutrient absorption. Hence nitrogenous fertilizers may be applied
		as slow release form like neem coated urea to get more nutrient
		efficiency.
		Postpone fertilizer application and spraying operations.
Sorghum	Sowing	To utilize the expected rainfall, premonsoon sowing of millets maybe
		taken up in rainfed.
Sugarcane	Vegetative	Since rainfall with squally wind is expected, dethrash and propping in
		five months old sugarcane crop is recommended against the lodging.
Banana	Above 5	Rainfall with wind speed of >10km may cause severe damage to
	months old	Banana. Provide adequate support to Banana of above 5 months old.
		Prevailing cloudy weather with high relative humidity with drizzling is
		favorable for the sigatoka leaf spot in turmeric hence farmers are
		requested to monitor the crop and spray if required cholorothalanil @
		2g per liter of water or propiconazole @ 2ml per liter of water.

Tapioca	Planting	Considering the anticipated rainfall, it is best time for planting tapioca.
		Before planting sett should be dipped in carbendazim solution @ 1g in
		1 lit water for 15 minutes.
Coconut		Basins of tree crops may be deepened to collect anticipating rainfall so
		as to harvest the rain water in root zone.
Animal		Since rainfall is expected drainage in and around cattle and poultry
Husbandry		sheds may be provided to avoid water stagnation. Further farmers are
		requested to safeguard the feed and fodder material from rain soaking.
		Weather is conducive for mastitis disease in milch animals. Hence,
		clean the udder with 1% potassium permanganate before and after
		milking.
		De worming in cattle's may be advised.

SMS advisory

Basins of tree crops may be deepened to collect anticipating rainfall so as to harvest the rain water in root zone.
