General Advisory:

Rainfall:

As per extended range predictions, there is possibility of generally below normal rainfall likely over the district during 05th to 11th April 2024.

As per extended range predictions, there is possibility of near normal to below normal rainfall likely over the district during 12th to 18th April 2024.

Maximum Temperature:

Maximum temperatures are likely to be above normal and are likely to be in the range of 38°C to 40°C, over the district from 05th to 11th April. 2024.

Maximum temperatures are likely to be slightly below normal and are likely to be in the range of 32°C to 36°C, over the district from 12th to 18th April 2024.

Minimum Temperature:

Minimum temperatures are likely to be slightly above normal and are likely to be in the range 20°C to 24°C over the district from 05th to 11th April 2024.

Minimum temperatures are likely to be slightly below normal and are likely to be in the range 20°C to 24°C over the district from 11th to 18th April 2024.

Livestock:

For livestock, the heat stress can be managed by spraying/ sprinkling water directly on the body of animals for a period of 1 to 5 minutes at an interval of 30-60 minutes. Cover the sides of the cow shed with wet gunny bags. Ensure the increased mineral supplementation to the animals during hot weather to meet the increased demand for minerals. The potassium-rich mineral mixture should be preferred for your cattle.

Agriculture:

Due to hot and humid conditions, discomfort weather is likely at isolated pockets over the district during next four days (06.04.2024 to 09.04.2024). Hence farmers are advised to plan their field activities during morning and evening hours and avoid working in the field during 12 noon to 4 Pm. Stay safe and take care. Drink adequate water.

Weather Based Agro-Advisories: (Papaya, Rose & Animal Husbandry).

Papaya:

The incidence of Whitefly is expected in Papaya. The symptom of damage appears under the surface of the leaves, the nymphs and adults suck the sap from the leaves and hence the leaves become yellow.

To control this, with respect to the height of the plant, place Yellow Sticky traps @ 8 Nos per Acre.

Prepare a (3G) solution with the combination of Green Chilly @ 250gm + Garlic @ 250gm + Ginger @ 100gm, grind well and mixed it with 3 litres of water, keep the solution overnight, spray 300ml of the extracted solution + Pseudomonas @ 40gm + Eggwhite @ 20ml per 10 litres of water.

Rose:

There is the incense of scales in the Rose crop. Rub off the scales with cotton soaked in kerosene or diesel.

Cut and burn the affected branches.

To control this, spray Fish oil rosin soap @ 25g/litre, at the time of pruning and again during the month of April.

Animal Husbandry:

Considering the increase in temperature, provide TANUVAS smart mineral mixture @ 50grams per day per animal.

Also provide adequate hygiene drinking water to your animal, to withstand the prevailing hot
