Agro Advisory

Crop	Stage	Advisory
General		<p>Dry days are expected during next week with wind speed of 4 -10 km/hr in western zone districts. Maximum temperature is slightly increasing.</p> <p>Irrigation may be done based on soil moisture and apply crop residue mulches to all irrigated crops to maintain sufficient soil moisture.</p> <p>By utilizing the dry days complete the harvest of samba paddy, pulses and millets at harvesting stage.</p> <p>After the harvest of crops disc/tiller may be used to plough the land immediately so as to control weeds and also to make the soil friable to conserve summer monsoon rain. Avoid burning of harvested crop residues and incorporation of crop residues in the field will facilitate faster decomposition of residues.</p>
Rice	Grainfilling	Prevailing weather condition is favorable for the ear head bug incidence in paddy crop hence monitor the crop carefully if required spray dichlorvos @ 2ml/liter of water.
Maize	Sowing	By utilizing the favourable weather, sowing of irrigated maize may be continued with assured irrigation.

Sugarcane	Planting	Under prevailing weather conditions planning may done to plant early season sugarcane as earliest possible,in order to harvest higher productivity
Banana		Prevailing weather is favourable for sigatoka leaf spot in banana where soil moisture is high. Therefore, dry the field and remove the affected leaves & burn it. Spray Carbendazim 1 g/lit., of water.
Animal Husbandry		Increase protein level and minerals in the feed concentrate to keep the animals healthy to cope up with the cold condition

SMS advisory

- Weather is conducive for sigatoka leaf spot banana where soil moisture is high. Dry the field and spray Carbendazim @1g/liter of water.
