SMS Advisory	Chances of light rain on 9 May. Maximum temperature would be in the range of 40°C to 43°C and the minimum temperature would be between 26°C - 29°C. Generally cloudy sky will appear for the next five days. Wind is expected with the speed of 10-20 Kmph from, Southeast & South directions.
---------------------	--

General Advisory:

Thunderstorms & lightning with light to Moderate rain are likely to occur at one or two places over the Tamilnadu during 08 & 09 May 2024. Gusty Wind with a speed of 30 to 40 kmph is expected for the same days. Hence farmers are advised to provide propping in sugarcane and to provide adequate support for crops like Banana, Papaya, Guava and Moringa, to prevent from lodging. For Gourds check the structures /pandhals for damages in the strings and poles and provide adequate support. Do not allow the animals to graze outside, standing near the trees, and don't tie the animals to electric poles. Provide safe shelter.

Wind with the speed of 10 to 20 kmphs expected for the next five days. Hence farmers are advised to provide propping in sugarcane and to provide adequate support for crops like Banana, Papaya, Guava and Moringa, to prevent from lodging. For Gourds check the structures /pandhals

Agriculture:

Due to hot and humid conditions, discomfort weather is likely at isolated pockets over the district during next two days (08.05.2024 & 09.05.2024). Hence farmers are advised to plan their field activities during morning and evening hours and avoid working in the field during 12 noon to 4 Pm. Stay safe and take care. Drink adequate water.

Weather Based Agro-Advisories: (Tapioca, Banana & Animal Husbandry).

Tapioca:

Micronutrient deficiency may occur in Tapioca crops under calcareous soils.

Hence, spray 1% of Ferrous Sulphate + 1% of Magnesium Sulphate + 0.1% Urea solution under enough soil moisture conditions.

Banana:

Light to moderate rainfall is expected for the coming days, using these weather conditions, Banana cultivators are advised to apply the biological inputs Azospirillum and Phosphobacteria, @ 20 grams of each per plant, which are in the growing stage, 5 months after planting.

Animal Husbandry:

Some amount of rainfall has been received during the recent days. This situation is favourable for the development of Aflatoxin infection in the Corn kernels and Paddy Straw, which may affect the health of your cattle.

To avoid this infection, check carefully and dry the Corn kernels and Paddy Straw before feeding.
