Agro Advisory

General		Farmers are advised to provide adequate drainage facilities to light rainfall link the drainage channel with farm ponds towards efficient water drainage besides the rain water storage.
		Since dry weather is expected in next five days, irrigate the sesame, sugarcane and rice fallow cotton crops.
		Since temperature is increasing, apply mulches to conserve soil moisture. Summer ploughing is also beneficial.
Pulses		Since temperature is increasing, sucking pest may increase in pulses. If needed spray 5% Neem Seed Kernel Extract.
Coconut		Inward basin may be formed around the coconut trees to catch the summer rain water in root zone.
Cattle	Cow	During summer, tick infestation flares up in all livestock. This might cause anemia & makes up way for various disease occurrences. The animal will be dull & depressed, difficulty in feed intake. Mix 3ml of butox in 1 litre of water and wash the animals with damp cloth.

SMS advisory

Farmers are advised to provide adequate drainage facilities to light rainfall link the drainage channel with farm ponds towards efficient water drainage besides the rain water storage.
